ning of each regular issue of the PCT Gazette.

(54) Title: DIAMINOTHIAZOLES AND THEIR USE FOR INHIBITING PROTEIN KINASES

(I)

(57) Abstract: Diaminothiazole compounds of formula (I) that modulate and/or inhibit the activity of certain protein kinases are described. These compounds and pharmaceutical compositions containing them are capable of mediating tyrosine kinase signal transduction in order to modulate and/or inhibit unwanted cell proliferation. The invention is also directed to the therapeutic or

prophylactic use of pharmaceutical compositions containing such compounds, and to methods of treating cancer as well as other disease states associated with unwanted angiogenesis and/or cellular proliferation, such as diabetic retinopathy, neovascular glaucoma, rheumatoid arthritis, and psoriasis, by administering effective amounts of such compounds.
